Index to "The Library Scene" Volume 9, 1980

Compiled by K. Subramanyam
Associate Professor, School of Library and Information Science, Drexel University

This index is an invaluable tool for library staff, binders, preservationists, library science students, book collectors and book lovers. It is an excellent resource which can and should be referred to frequently. Beginning with this index, the previous year's volume of *The Library Scene* will be indexed in issue number 1 (March).

The subject index covers all articles and editorials, but excludes news items, announcements and advertisements. The author index includes authors of articles, editorials, book reviews and letters to the editor. The location mark in each entry consists of the issue number followed by the beginning page number. Thus, the entry "Mass deacidification ... 1-12" means that information on mass deacidification can be found in an article beginning on page 12 of issue number 1 (March, 1980). The entries are filed alphabetically, letter-by-letter.

Subject Index

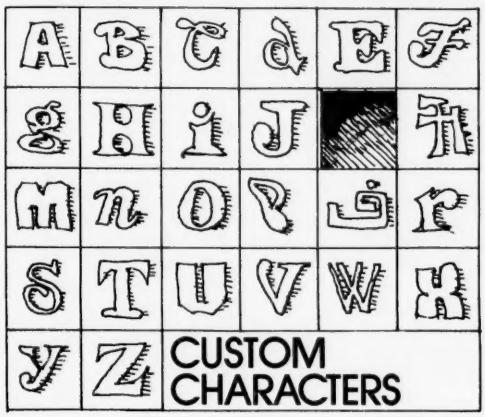
SYSTEM2
Flesher Corporation



Perhaps the best thing about our print wheel is that you're not limited to one type face.

Or . . . it could be the fact that each character is replaceable. It pops right out and a new one pops in.

Then again, we think it's a real plus that Flesher Corporation stocks replacement characters for standard type faces.

Maybe the best thing is that it only takes a couple of minutes to change print wheels.

Could it be that the best thing about System 2 . . . is the print wheel?

Flesher Corporation P.O. Box 976 Topeka, Kansas 66601 913•354•7633
